\* Daily Value Not Established

Other Ingredients: Plant cellulose, vegetables stearates, magnesium stearate and natural silica.

The stress response involves complex interactions among the nervous, endocrine, reproductive and immune systems. The goal in nutritional support of stress management is to bring the body back to a level of dynamic balance. The herbs used in this formula are known as adaptogens and have a long successful history of balancing and restoring the adrenal glands.

**Recommended Usage:** 1 tablet in the morning and 1 tablet at lunch. Take in combination with Totally Stressed® Homeopathic and iStressedOut™ chewable tabs or as directed by a health care professional. If you are pregnant or nursing, seek the advice of a health care professional before using this product.

### **Who Can Benefit From Totally Stressed®?**

Anyone who is under acute stress or chronic unrelenting stress or anyone with symptoms of improperly functioning adrenal glands due to stress.

### **How Does Totally Stressed® Work?**

The herb Glycyrrhiza glabra (licorice) has been traditionally used as an adrenal tonic and it increases production of the chemicals that aid in the body's recovery from chronic anxiety and stress. Siberian Ginseng has been traditionally used as an adaptogenic and restorative tonic for use in debilitated persons suffering from exhaustion, fatigue, stress and chronic disease. Chinese medicine uses Astragalus hoartchy for its effects on adrenal insufficiency, chronic fatigue, diabetes, hypertension, immune deficiency and weakness of the extremities.

### **Is Totally Stressed® Clinically Effective?**

The individual herbs in Totally Stressed™ have been used medicinally to combat symptoms of stress since ancient times. The B vitamins have long been recognized for their positive 'stress-impacting' benefits.

### **Are There Any Contradictions For Use?**

Avoid any ingredient(s) you may be allergic to. Consult with your practitioner if you are pregnant, lactating, on medication or have a health condition.
